

## Peter Nguyen

Photographer Peter Nguyen uses Alien Skin Exposure as an important part of his workflow. This is just one example of the many beautiful portraits he has created.

## New Interface

Exposure 5 now has a dark interface theme, a scrolling parameter area, and collapsible side panels. These improvements provide a seamless experience when going to Exposure from Photoshop or Lightroom. This image shows Exposure's new capability to separately control texture effects: borders, light leaks, and dust & scratches.

## Preset Browser

Presets are now explored visually as thumbnails. This allows easy exploration of the hundreds of effects in Exposure 5. And, you can also explore your custom created, favorites, and recently used settings.
